2009 California Marketing Intelligence Snapshot

- California hosted 322.0 million domestic stay-visitors in 2009, decreasing 4.7% over 2008 with both Leisure (-4.4%) and Business (-5.6%) contributing to the decline. Of those who visited California in 2009, 243.9 million traveled for Leisure while 78.1 million traveled for Business. California Residents traveling within the State declined 4.7% to 276.2 million in 2009. Similarly, Non-Resident visitation declined 4.8% over 2008, reaching a low of 45.8 million in 2009.
- California travel in and to continue to comprise the largest share of the U.S. domestic travel market - decreasing from 11.27% in 2008 to 11.20% in 2009. California reports the largest shifts among its competing destinations with Leisure declining 0.26 percentage points to 11.09%, while Business increased 0.6 percentage points 11.62%.
- California hosted 182.8 million domestic trip-visitors in 2009, decreasing 5.4% over 2008 with the larger Leisure travel segment decreasing only 1.1% but the smaller Business segment losing 16.7% in share. Of those trip-visitors who visited California in 2009, 138.5 million traveled for Leisure while 44.24 million traveled for Business. California Residents traveling within the State declined 5.7% to 144.7 million in 2009. Similarly, Non-Resident visitation declined 4.1% over 2008, reaching a reported low of 38.1 million in 2009. The growth of 2.4% in Leisure Non-Resident travelers was not sufficient to offset the decline in Business Non-Resident travelers.
- After last year's decline, average daily visitor spending increased across all California travel segments in 2009, ranging from -0.3% for Leisure Resident to 5.0% for the Leisure Non-Resident segment. Overall, the average daily spending by a California visitor grew 1.8% to \$125.1 in 2009. As expected, Business travelers spent the most per day (\$171.0) while in-state Leisure travelers spent the least per day (\$101.9).
- The largest proportion of California daily visitor spending in 2009 was Transportation (28.5%), followed by Food (23.4%), Room expenses (16.6%), Shopping (13.1%), Entertainment (12.9%) and Miscellaneous expenses (5.4%).
- On average, California visitors were 44 years of age in 2009, a drop of 3 years after years of relative stability. Among California visitors, Business travelers were the oldest (46 years) while all other travel segments were younger (each 44 years).
- Despite the weakened economy, California visitors averaged an annual household income of \$94,513 in 2009, increasing from \$93,451 in 2008. The largest proportion of visitors held Managerial/Professional occupations. Seven out of ten California visitors were married.

- Leisure remained the primary purpose of stay in 2009, accounting for over three-fourths of all California travel. Out of those who visited the State for Leisure, the majority traveled to Visit Friends/Relatives (31%), followed by Special Events (19%), Other Personal Reasons (21%), General Vacation (13%) and Getaway Weekends (16%).
- The typical California travel party consisted of 2.15 persons in 2009, a slight increase over 2008. Among those, Business travel parties were the smallest (1.46 persons) while Leisure Resident parties were the largest (2.49 persons). The largest proportion of California travel parties were comprised of One Adult (40%), followed by Couples (26%) and Families (21%).
- California travel parties averaged a stay length of 2.13 days in 2009; compared to 2.10 days in 2008- as half of all California travel parties were Day-Trippers, particularly Residents traveling within the State. Conversely, Non-Residents averaged a stay length of 4.01 days as half stayed between 1-3 nights and another quarter reporting a stay of 4-7 nights.
- California travel parties enjoyed several activities during their stay in 2009, especially Dining (36%), Shopping (21%), Entertainment (20%), Touring/Sightseeing (13%), Theme/Amusement Park (7%), Beach/Waterfront (6%) and Night Life, Festival/Craft Fair, Attend Sports Event, and Museum/Art Exhibit (each 4%).
- Eight out of ten visitors arrived by auto in 2009, followed by air (10%) and other transportation modes (8%). On average, visitors traveled 332 miles each way regardless their mode of transportation, ranging from a low of 162 miles (Residents and Resident Leisure) to a high of 1,243 miles (Non-Resident).
- Hotels (52%) remained the accommodation of choice for California visitors staying overnight, especially High-End (20%) and Mid-Level (19%) properties. Private Homes represented over one-third of all overnight visitation - mirroring the proportion of visitors traveling to visit Friends/Relatives.
- The Pacific and Mountain divisions continued to generate the largest proportion of California visitors in 2009. On a micro level the majority of California visitors were from within the State itself (84.3%), followed by Arizona (2.6%), Nevada (1.9%), Texas (1.4%) and Washington (1.1%).
- In terms of Non-Resident visitation, half of all California visitors arrived from MSAs such as Phoenix-Mesa-Scottsdale, AZ (11.5%), Las Vegas-Paradise, NV (8.2%), Reno-Sparks, NV (3.5%), Chicago-Naperville-Joliet, IL (3.3%), New York-Wayne-White Plains NY-NJ (2.7%), Atlanta-Sandy Springs-Marietta, GA (2.7%), Seattle-Bellevue-Everett, WA (2.5%), Denver-Aurora, CO (2.5%), Portland-Vancouver-Beaverton, OR-WA (2.4%), Salt Lake City, UT (2.4%), Yuma, AZ (2.3%), Tucson, AZ (2.0%), Tacoma, WA (1.9%), Dallas-Plano-Irving, TX (1.8%), Houston-Baytown-Sugar Land, TX (1.6%), and Washington-Arlington-Alexandria, DC-VA (1.6%).

2009 U.S. Economy in Review

- The U.S. economy retracted at an annualized rate of 2.4% in 2009, the worst performance since 1946. However, the worst recession since the Great Depression finally came to an end in the second half of the year, as the economy expanded 2.2% and 5.9% in the third and fourth quarters respectively.
- Disposable Personal Income remained flat and stood at \$32,519 in 2009, basically unchanged over 2008.
- As expected, Personal Consumption Expenditures declined 1.5% to a four year low of \$30,034 in 2009.
- Unemployment peaked at 10.1% in October, the worst monthly reading in 26 years. Overall, 2009 averaged an unemployment rate of 9.3% as companies, particularly in the financial and manufacturing sectors shed thousands of jobs.
- The Consumer Confidence Index bottomed out at 25.3 in February, the worst reading since the index began in 1967 - finishing 2009 at 45.2.
- Despite the economic collapse, crude oil prices remained below \$80 a barrel, ranging from a low of \$38 in January to a high of \$74 in December. Gas prices followed a similar trend, remaining below \$2.65 per gallon throughout 2009.
- The Consumer Price Index stood at 214.5, relatively flat in 2009 over 2008. However, the Travel Price Index, which measures the cost of travel, decreased from 257.7 in 2008 to 241.5 in 2009 due to deep travel discounts.

Please note, market share estimates may differ slightly from calculating directly from the volume estimates in some instances. Travel volume is estimated using the Small Area Estimation Model. Due to the modeling process, it is not recommended to calculate market share from the volume estimates. Instead, market share is derived directly from the survey responses and is provided in the report under the Market Share column. Any differences are within range of statistical error.

DKSA is committed to using the best available data sources at the time of publishing. As a result, historical numbers may change due to improved methodologies and additional data input. *Data not purchased.

N-Res	Domestic travel to California by non-residents						
Lei Res	Domestic leisure travel within California by California residents						
Lei N-Res	Domestic leisure travel to California by non-residents						

"*" indicates the finding is less than 1%

Weight Explanations

- **Stays Weight** - Represent the number of individuals that travel (so-called travel groups or parties) and the number of destinations they visited on a trip, regardless of the number of people within the travel group and if they originated from the same household or not . It is the most basic travel weight and broadest unit used for measuring a travel experience. To arrive at the Stays weight, the respondent weight is adjusted based on variables in order to ensure that there are a certain number of trips that fit standards. These adjustments are based on length of stay, length of trip, mode of transportation, purpose of trip, and special adjustments for particular mailing months and destinations.

Example: Mr. & Mrs. Smith's 5-day trip to State A, where they visited Anytown A and Anytown B = 2 Stays

- **Person-Stays Weight** - The total number of people that traveled, regardless of the length of their stay. This measure equates to the number of visitors and can be influenced by changes in the number of travel parties or the number of people in the travel party.

Example: Mr. & Mrs. Smith's 5-day vacation in Anytown, USA = 2 Person-Stays or 2 visitors.

- **Person-Days Weight** - This is simply the total number of days that visitors contributed to a destination. This measure can be influenced by changes in number of visitors, changes in length of stay of these visitors, changes in party composition shares, and/or changes in the day/overnight mix.

Example: Mr. & Mrs. Smith's 5-day vacation in Anytown, USA = 10 Person-Days (2 Person-Stays x 5 days).

Confidence Level

The confidence interval table indicates how well the data - based on a sample - reflects the entire population of travelers. The smaller the interval, the more accurate the data and the greater confidence we have that the sample number represents the population. For example, if the air travel finding for the California is 10% - using the chart below-we can say that the actual proportion of the population is 10% plus or minus 0.8 percentage point. DKSA uses a 90% confidence level because it reflects a good balance between accepting a difference in findings as real when it in fact is not, and rejecting a difference as not real, when it actually is (in statistical terms, the tradeoff between making a “Type I” and “Type II” error).

	Sample Size for 2009	Percentage Finding in Report or Data Table				
		0 to 2% or 98% to 100%	2% to 5% or 95% to 98%	5% to 10% or 90% to 95%	10% to 25% or 75% to 90%	25% to 75%

***PERFORMANCE/Monitor*SM Methodology**

- Founded in 1982, D.K. Shifflet & Associates, Ltd. specializes in syndicated and custom market research in the travel and tourism industry.
 - Syndicated - Monitor U.S. Travel behavior: *PERFORMANCE/Monitor*SM - largest, ongoing travel tracking study in the industry
 - Custom - Segmentation and positioning studies to assist clients in strategic marketing efforts
 - Clients - include destinations, theme parks, credit cards, auto clubs, hotels chains among others

- To meet the need for quality information, DKSA conducts an ongoing, monthly survey of U.S. consumers' travel behavior—the *PERFORMANCE/Monitor*SM.
 - Surveys approximately 40,000 households per month via mail and online panels
 - Each survey collects the previous 3 months of travel behavior
 - DKSA uses an overlapping monthly mail sequence which reduces sample bias for maximum accuracy
 - More than 75,000 traveling households respond to the survey each year. This results in more than 154,000 Stays at destinations throughout the U.S.

- DKSA's methodology provides superior quality control measures:
 - We use nationally representative panels of households who have agreed in advance to periodically participate in mail and online surveys. Extensive information about the household and its members is obtained at the time of household recruitment. Thus, a key advantage of the household panel is knowing to whom surveys are sent and from whom surveys are received. Another key advantage of the panel method is higher response rates to surveys—typically 2 to 3 times higher.
 - The 40,000 average monthly contacts as well as returned questionnaires are balanced to the U.S. population across six demographic variables (age, gender, income, education, number of adults, and state of residence). This rebalancing ensures findings are reflective of the U.S. population and enables findings to be projected to the entire U.S. population.
 - Returned questionnaires go through an extensive set of manual (visual) and automatic (computer program) processing checks to improve data quality. Questionnaires containing anomalies are discarded or corrected based on insights developed from more than a decade of processing experience.

- All volume estimates in this report are based on a visitor volume methodology incorporating a small-area estimation model employed following the dramatic changes to travel behavior following September 11, 2001. The small-area estimation component adds enhanced reliability to quarterly and annual estimates by using other data sources (such as hotel room demand and government transportation statistics) as data “anchors” or “reality checks.” Data reported reflect the influence of the revised volume model and the influence of revised population estimates resulting from the 2000 Census.
